Cumulative Author-Title Index

For: Vol. 1, No. 1, 2, 3, 4 (1979–1981)
Vol. 2, No. 1, 2, 3, 4 (1981–1983)
Vol. 3, No. 1, 2, 3, 4 (1983–1984)

Abeyama, S.: The Influence of Heat Treatment and Cold Forging on Machinability of Low Alloyed Steels ..... *2*(4) 243–248
Abstracts of Metalworking Literature ..... *1*(1) 89–107
Abstracts of Metalworking Literature ..... *1*(2) 84–107
Abstracts of Metalworking Literature ..... *1*(3) 67–86
Abstracts of Metalworking Literature ..... *1*(4) 64–79
Abstracts of Metalworking Literature ..... *2*(1) 55–74
Abstracts of Metalworking Literature ..... *2*(2) 126–155
Abstracts of Metalworking Literature ..... *2*(3) 224–236
Abstracts of Metalworking Literature ..... *2*(4) 302–320
Abstracts of Metalworking Literature ..... *3*(1) 47–90
Abstracts of Metalworking Literature ..... *3*(2) 175–228
Abstracts of Metalworking Literature ..... *3*(3) 321–376
Abstracts of Metalworking Literature ..... *3*(4) 451–489
Advances in Forging Technology: Report on the North American Forging Technology Conference—1983, A: Hoang-Vu, K. and Raghupathi, P. S. ..... *3*(2) 165–172
Aichbhaumik, D.: The Redrawability of Several Organic Coated Container Steels and the Characteristics of Redrawn Cans ..... *3*(1) 12–22
Akgerman, N.: Computer-Aided Roll Pass Design in Rolling of Airfoil Shapes ..... *1*(3) 30–40
Altan, T.: Computer Aided Design and Manufacturing (CAD/CAM) of Hot Forging Dies ..... *2*(2) 77–85
Computer-Aided Roll Pass Design in Rolling of Airfoil Shapes ..... *1*(3) 30–40
A Practical Method for Estimating Forging Loads with the Use of Programmable Calculator ..... *1*(2) 60–88
Systems Approach in Massive Forming and Application to Modeling of Forging Processes ..... *1*(1) 29–40
Applicability of Coulomb's Friction Law to Drawbeads in Sheet Metal Forming, The: Nine, H. D. ..... *2*(3) 200–210
Application of Republic Steel Corporation's Simulated Gear Cutting Test to the Development of Improved Machining Steels: Brossard, L. D. ..... *1*(1) 59–64
ASM/SME International Conference on Machinability Testing and Utilization of Machining Data: Tipnis, V. A. and Thompson, R. W. ..... *1*(1) 65–72
Assessment of Powder Metallurgy Today and Its Future Potential, An: Pease, L. F., III ..... *3*(3) 242–256
Automated Hydraulic Bulge Tester, An: Young, R. F., Bird, J. E., and Duncan, J. L. ..... *2*(1) 11–18
Avitzur, B.: Drawing of Heavy Wall Tubing with Floating Plugs ..... *2*(4) 258–263
Ayres, R. A.: Evaluating the GMR-Limiting Dome Height Test as a New Measure of Press Formability Near Plane Strain ..... *1*(1) 41–49
SHAPESET: A Process to Reduce Sidewall Curl Springback in High-Strength Steel Rails ..... *3*(2) 127–134
Azrin, M.: Soviet Progress in Thermomechanical Treatment of Metals ..... *1*(2) 5–34

Badger, D. V.: Investigation of Shot Peening as a Forming Process for Aircraft Wing Skins ..... *1*(4) 34–44
Bagchi, A.: Wear Mechanisms that Dominate Tool-Life in Machining ..... *1*(4) 15–23
Bilalis, N. C.: The Flexible Manufacturing Systems (FMS) in Metal Removal Processing, An Overview ..... *3*(4) 400–409
Bird, J. E.: An Automated Hydraulic Bulge Tester ..... *2*(1) 11–18
Böer, C. R.: Choosing Optimal Forging Conditions in Isothermal and Hot-Die Forging ..... *3*(4) 421–431
Roll Pass Design by Interactive Graphic Computing ..... *3*(4) 432–438
Book Review—Kalpakjian, S.: Tribology in Metalworking; Schey, J. A. ..... *3*(2) 173–174
Book Review—Shaw, M. C.: Manufacturing Processing for Engineering Materials; Kalpakjian, S. ..... *3*(4) 446
Boulger, F. W.: Review of Foreign Research and Development on Computer-Aided Metal Forming Systems ..... *1*(1) 20–28
Bourell, D. L.: Roll Pressure Modeling of Multipass Warm Rolling of Carbon Steel ..... *3*(3) 264–271
Bradley, E. F.: Near Net Shape Processing for Gas Turbine Components ..... *1*(1) 73–80
Brazier, W. G.: Evaluating the GMR-Limiting Dome Height Test as a New Measure of Press Formability Near Plane Strain ..... *1*(1) 41–49
Brossard, L. D.: Application of Republic Steel Corporation's Simulated Gear Cutting Test to the Development of Improved Machining Steels ..... *1*(1) 59–64

Chanani, G. R.: A Quality Control Test to Determine the Propensity for Lüders Lines Formation in 2024-T3 ..... *3*(1) 23–31
Chandrasekaran, N.: Cold Upsetting and Free Surface Ductility of Some Commercial Steels ..... *3*(3) 257-263
Cheng, F.-L.: The Redrawability of Several Organic Coated Container Steels and the Characteristics of Redrawn Cans ..... *3*(1) 12–22
Chollet, P.: Tool Angle Optimization in Rod and Tube Drawing ..... *2*(4) 264–276
Choosing Optimal Forging Conditions in Isothermal and Hot-Die Forging: Böer, C. R., Rydstad, H., and Schröder, G. ..... *3*(4) 421–431
Chryssolouris, G.: Turning of Hardened Steels Using CBN Tools ..... *2*(2) 100–106
Cold Upsetting and Free Surface Ductility of Some Commercial Steels, The: Sowerby, R. and Chandrasekaran, S. ..... *3*(3) 257–263
Comparison of a Dual Phase Steel with Other Formable Grades: Waddington, E., Hobbs, R. M., and Duncan, J. L. ..... *1*(2) 5–34
Comparison of Correlations Between Press Performance and Dome Tests Results Using Two Dome Test Procedures, A: Story, J. M. ..... *3*(3) 292–300
Computer Aided Design and Manufacturing (CAD/CAM of Hot Forging Dies: Altan, T. ..... *2*(2) 77–85
Computer-Aided Roll Pass Design in Rolling of Airfoil Shapes: Akgerman, N., Lahoti, G. D., and Altan, T. ..... *1*(3) 30–40
Computer Prediction of the Deformed Shape of a Draw Blank During the Binder-Wrap Stage: Tang, S. C. ..... *1*(3) 22–29
Control of Springback in a Flanging Operation: Davies, R. G. and Liu, Y. C. ..... *3*(2) 142–147

Cook, C. S.: A Model of Chatter Due to Stick-Slip in the Plug Drawing of Tubing ..... *1*(2) 69–75
Correlation of Tensile Properties with Plain Strain Limited Dome Heights: Stevenson, R. ..... *3*(3) 271–280

Danckert, J.: Physical Modeling of Metal Forming Processes ..... *1*(3) 5–14
Davies, R. G.: Edge Cracking in High Strength Steels ..... *2*(4) 293–299
Control of Springback in a Flanging Operation ..... *3*(2)142–147
"Side-Wall Curl" in High-Strength Steels ..... *3*(2) 120–126
Springback in High-Strength Steels ..... *1*(4) 45–52
Davies, R. H.: The Effect of Nitrogen on the Machinability of Low-Carbon, Free-Machining Steels ..... *3*(2) 110–119
Deep, G.: Tool Angle Optimization in Rod and Tube Drawing ..... *2*(4) 264–276
Demeri, M. Y.: Formability Guidelines for Aluminum Alloys ... *2*(4) 288–292
The Stretch-Bend Forming of Sheet Metal ..... *2*(1) 3–10
Development of a New Forming Process for Gun-Nail Heads by Simulation: Nielsen, O. and Wanheim, T. ..... *1*(3) 15–21
Development of a Predictive Model for Draw Bead Restraining Force Utilizing Work of Nine and Wang: Levy, B. S. ..... *3*(1) 38–44
Developments In Forging Technology: a Report on the North American Forging Technology Conference—1981: Rajagopal, S. ..... *2*(2) 86–93
Devenpeck, M. L.: Punch Friction Tests for Sheet Metal Forming ..... *3*(1) 3–11
DeVries, M. F.: The Manufacture of an Ancient Silver Bowl ..... *1*(3) 52–60
Dover, I. R.: The Influence of Microstructure on the Formability and Fracture of an Aluminum-Copper Alloy (2036) ..... *1*(4) 24–33
Drawing of Heavy Wall Tubing with Floating Plugs: Avitzur, B. ..... *2*(4) 258–263
Duncan, J. L.: An Automated Hydraulic Bulge Tester ..... *2*(1) 11–18
Comparison of a Dual Phase Steel with Other Formable Grades ..... *1*(2) 5–34
The Influence of Microstructure on the Formability and Fracture of an Aluminum-Copper Alloy (2036) ..... *1*(4) 24–33
Punch Friction Tests for Sheet Metal Forming ..... *3*(1) 3–11

Edge Cracking in High Strength Steels: Davies, R. G. ..... *2*(4) 293–299
Effect of Annealing and Etching on Machining Damage in Structural Beryllium: Hanafee, J. E. ..... *1*(3) 41–51
Effect of Nitrogen on the Machinability of Low-Carbon, Free-Machining Steels, The: Watson, J. D. and Davies, R. N. .. *3*(2) 110–119
Embury, J. D.: The Influence of Microstructure on the Formability and Fracture of an Aluminum-Copper Alloy (2036) ..... *1*(4) 24–33
Empirically Derived Equations for Predicting Springback in Bending: Levy, B. S. ..... *3*(2) 135–141
Evaluating the GMR-Limiting Dome Height Test as a New Measure of Press Formability Near Plane Strain: Ayres, R. A., Brazier, W. G., and Sajewski, V. F. ..... *1*(1) 41–49

Farge, J. C.: Tool Angle Optimization in Rod and Tube Drawing ..... *2*(4) 264–276
Flexible Manufacturing Systems (FMS) in Metal Removal Processing, An Overview, The: Bilalis, N. G. and Mamalis, A. G. ..... *3*(4) 400–409
Formability of Dual-Phase Steels, The: Hansen, S. S. ..... *2*(2) 107–118
Formability Guidelines for Aluminum Alloys: Demeri, M. Y. ... *2*(4) 288–292
Fracture in Rolling Processes: Schey, J. A. ..... *1*(2) 48–59
Friction and Lubrication in Bulk Metal-Forming Processes: Wilson, W. R. D. ..... *1*(1) 7–19

Gervais, E.: Tool Angle Optimization in Rod and Tube Drawing ..... *2*(4) 264–276
Gorsler, F. W.: A Report on the International Conference on Cutting Tool Materials ..... *1*(4) 58–61
Grinding of Metals: Theory and Application: Malkin, S. ..... *3*(2) 95–109
Gronbaek, J.: Physical Modeling of Metal Forming Processes ..... *1*(3) 5–14

Hammer Forging of Thin Sections in Antiquity: Thomsen, E. G. and Thomsen, H. H. ..... *1*(1) 50–58
Hanafee, J. E.: Effect of Annealing and Etching on Machining Damage in Structural Beryllium ..... *1*(3) 41–51
Hansen, S. S.: The Formability of Dual-Phase Steels ..... *2*(2) 107–118
Harkness, J. C.: The Rifled Musket—Materials and Manufacture ca. 1860 ..... *3*(3) 301–311
Hebsur, M.: Improved Hot Workability by Control of Non-Metallic Inclusions in Steels ..... *1*(1) 38–44
Hill, V. L.: Machining Aerospace Alloys with the Aid of a 15 kW Laser ..... *2*(3) 170–184
Hoang-Vu, K.: Advances in Forging Technology: A Report on the North American Forging Technology Conference—1983 ..... *3*(2) 165–172
Hobbs, R. M.: Comparison of a Dual Phase Steel with Other Formable Grades ..... *1*(2) 5–34

Improved Hot Workability by Control of Non-Metallic Inclusions in Steels: Hebsur, M. ..... *2*(1) 38–44
Influence of Heat Treatment and Cold Forging on Machinability of Low Alloyed Steels, The: Abeyama, S., Kimura, A., and Nakamura, S. ..... *2*(4) 243–248
Influence of Microstructure on the Formability and Fracture of an Aluminum-Copper Alloy (2036), The: Dover, I. R., Embury, J. D., and Duncan, J. L. ..... *1*(4) 24–33
Influence of Voids on the Strength of Wrought Materials: Pai, D. M. and Shaw, M. C. ..... *3*(4) 439–446
Investigation of Shot Peening as a Forming Process for Aircraft Wing Skins: Kulkarni, K. M., Schey, J. A., and Badger, D. V. ..... *1*(4) 34–44

Johnson, L. K.: Stretch Flanging of "V"-Shaped Sheet Metal Blanks ..... *3*(3) 281–291
